

4-((2-aminoethyl)(5-chlorobenzo[d]oxazol-2-yl)amino)butan-2-one Dimethanesulfonate 1276666-12-6

<i>Structure</i>	
<i>Name</i>	4-((2-aminoethyl)(5-chlorobenzo[d]oxazol-2-yl)amino)butan-2-one dimethanesulfonate
<i>CAS Number</i>	1276666-12-6
<i>Catalog Number</i>	CF258088
<i>Purity</i>	98%
<i>Appearance</i>	Light brown solid
<i>Molecular Formula</i>	C ₁₅ H ₂₄ ClN ₃ O ₈ S ₂
<i>Molecular Weight</i>	473.949
<i>Sample</i>	Available
<i>COA and Spectra</i>	Available upon request
<i>Shelf time</i>	Two years
<i>Packaging</i>	Aluminum foil bag/fluoride bottle/drum
<i>Origin:</i>	China

Company Profile

Shanghai Zaiqi Bio-Tech Co., Ltd., established in year 2004, is an innovative company specialized in R&D and manufacturing of active pharmaceutical intermediates, active pharmaceutical ingredients (API), specific auxiliaries and fine chemicals. Our newly built and well equipped R&D center covers an area of 2020 sqm and is capable of offering catalog products, custom contract service from g up to 20 kgs, process development and optimization. For large quantity product, our joint-ventured plant in Liaoning Province can scale up production to mt with various volume facilities. Both Shanghai R&D center and Liaoning plant have ISO9001 certified and have an in-built quality

management system in every single stage of enterprise daily operation, from research to manufacturing, from QC to logistics.

Since the very first day of establishment, we keep in mind that trust is the basis of building and nurturing business relationship. Therefore, it is our working style and practice that being honest toward customers and keeping customers informed with progress updates on regular basis.

FAQs

How can Shanghai Zaiqi ensure security of IP (Intellectual property)?

During the past decade, we have established business relationship with hundreds of customers in domestic and overseas market on both exclusive and non-exclusive contract levels.

For exclusive contract, two set of NDA (non-disclosure agreement), one set signed by customers and our company, one set signed by all project related technicians and our company, are required prior to the start of contract service.

In addition, company has implemented a range of measures in protecting confidential information and IP in daily operation.

Training in how to handle confidential information;

Detailed regulation in handling and protection of confidential information indicated employee handbook;

Non-disclosure fees are inclusive in employees' salary;

Last but not least, we are proud that our layoff rate of R&D employees are at a low level of 10% during the past two years.

Does Shanghai Zaiqi has custom research service (CRS)?

As an innovative small-sized technical company, actually CRS is the cornerstone and an essential part of company business development. Around half of chemicals in our product library are accumulated from CRS projects. CRS keeps us staying in the frontier of this highly innovative and highly competitive industry.

Does Shanghai Zaiqi has custom manufacturing service (CMS)?

With the existing production capability of our manufacturing plant in Fuxin, Shanghai Zaiqi is capable to do process development and optimization and production scale-up to hundreds of kgs and multi tons on non-GMP basis at a

competitive market price. The Fuxin manufacturing plant is ISO9001 approved and can offer a completed set of quality documents and records.

What's Shanghai Zaiqi's quality policy?

With advantage of Quality Management System ISO9001 which was taken into effective since early 2016, we strictly conform to SOP in daily operation of the whole company, from purchasing to administration, from R&D to logistics. After one year's implement, we benefit a lot in terms of traceability. We found we progress a lot in internal management and work effectiveness.

How do you handle customer complaints?

CAPA (Corrective and Preventive Action) is a crucial part of SOP. We treat each customer's complaint as an opportunity to improve ourselves by correction and prevention. We have a completed set of CAPA forming and handling procedure in all related parties aiming at minimizing lost and re-occurrence rate while maximizing "lesson effect" internally.

Should you're in need of

4-((2-aminoethyl)(5-chlorobenzo[d]oxazol-2-yl)amino)butan-2-one dimethanesulfonate 1276666-12-6, welcome to contact Zaiqi Bio-Tech. We are one of the leading manufacturers and suppliers in China and we have many professional vendors spread around the world to serve you at any time.
